## Summary

Computer Science undergraduate specializing in front-end and interactive 3D web development with React, Next.js, Three.js and GSAP, plus hands-on experience building AI-powered computer vision applications in Python. Looking for internship opportunities to build fast, polished, user-focused products.

## Education

### Tula's University

*B.Tech in Computer Science and Engineering (Core)*

Dehradun, Uttarakhand

*2023 – Present*

- **SGPA (Semester 1):** 8.52

## Technical Skills

**Languages:** JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3

**Frontend & 3D:** React.js, Next.js, Three.js, GSAP, Tailwind CSS, Redux, Zustand

**AI & Computer Vision:** MediaPipe, OpenCV, Streamlit, Groq API

**Backend & APIs:** REST APIs

**Tools & Platforms:** Git, GitHub, VS Code, Android Studio, Termux, Vercel

## Projects

### EstateVision 3D | *HTML5, CSS3, JavaScript, Three.js, GSAP, Vercel*

- Built a real estate landing page with 360° GLTF model walkthroughs, spatial 3D hotspots and smooth camera zoom transitions, using vanilla JavaScript without heavy frameworks.
- Designed a glassmorphism UI with a custom WebGL cursor glow, 3D card-tilt effects and fully responsive layouts.
- Implemented client-side property filters and a reactive mortgage EMI calculator with real-time computation and an animated slider UI.

### AI Gym Coach | *Python, Streamlit, MediaPipe, OpenCV, Groq API*

Smart India Hackathon 2026

- Developed an interactive web app using MediaPipe and OpenCV that detects body pose and gives real-time posture feedback during workouts.
- Integrated the Groq API to generate low-latency, personalized AI coaching recommendations.
- Built and deployed the project end-to-end as a presentation project for Smart India Hackathon 2026.

## Hackathons & Activities

**Core Team Applicant** | *AWS Student Builders Group, Tula's University*

August 2026

**Participant** | *QHackathon 2026, Tula's Institute, Dehradun*

May 2026
